Hi Becky,
This is to let you know that I submitted it through CDX as a support document.

Thanks,

Regina Green

Product Steward

Hi Regina, could you please submit the information below as an amendment to the SNUN through CDX so it is an official part of the submission. I can easily arrange a call once who have done that. Thanks.

Subject: RE: [External]RE: Redacted Reports Attached

Hi Andrew,

After reviewing the documents that were forwarded to Hexion, it appears to have ignored some of the test data in the information supplied to EPA. This is below.

- In the assessment of aquatic toxicity, EPA has giving no reason for relying on the ECOSAR predicted value for Green Algae toxicity rather than the test results submitted
 - 96-hr EC50 of >12 mg/l in the test data submitted to EPA compares to a value of 0.28 mg/l (acute) and 0.08 mg/l (chronic) by ECOSAR
 - Applying the same ACR as the ECOSAR prediction to the test data results in a chronic value of 3.43 mg/l, leaving the fish as the most sensitive species, rather than green algae
 - Using the fish results of 4.2 acute and 0.42 chronic results in concentrations of concern of 1050 ppb acute and 42 ppb chronic

- Based on this, at a minimum the Consent Order and SNUR should have the release to water value increased to 42 ppb
 - If this would be a possible outcome based on the test data could this be addressed without the SNUN based on the test results supplied to EPA?
 - If changes to the SNUR with regard to SWC can be made outside of the SNUN, Hexion would withdraw the SNUN

Hexion would like to schedule a call with EPA to discuss the path forward. Please let us know when you would be available for such a call.

Thanks,

Regina Green

Hi Andrew,

Thank you for forwarding the reports. Hexion is reviewing and will be formulating a detailed response to submit to EPA. At a high level, it appears that EPA ignored the algal ecotoxicity test result and relied on the predicted value from ECOSAR. We also have questions on how the lower rate of the PMN substance to acetaldehyde was accounted for in the calculation of the POD, particularly in light of the metabolism study results. Also, can you please send a copy of the exposure report for us to review. It wasn't included in the other documents.

We will send our more detailed response shortly.

Thanks,

Regina Green

Hello Regina,

I have attached the password protected reports that you have requested. I will send you the password in a separate email. Please reply all confirming receipt and ability to access the reports.

Thank you.
